**DETAILED ACTION**  
**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Timothy Klima on 9/7/2011.

The application has been amended as follows:

Claim 1 has been amended as follows:

A system for monitoring and controlling a line manufacturing tobacco products, comprising:

a plurality of production devices and units connected by a common interface network to at least one of a respective master control unit and a visual display;

an auxiliary inspection unit associated with the manufacturing line and connected to the network, for receiving tobacco products from at least one of the production devices and units as test samples, for verifying at least one characteristic of the tobacco products taken as test samples and transmitting signals indicative of the at least one characteristic to the network;

wherein the auxiliary inspection unit comprises a transferring mechanism for transferring the tobacco products, connected to the manufacturing line by a sampling device for sampling products for testing purposes;

wherein the sampling device comprises a conveyor having single pockets, each for containing a tobacco product;

wherein the sampling device comprises a shifter mechanism, interposed between an outfeed roller of the filter tip attachment machine and the conveyor, and movable between a first position and a second position in which a feed channel directing products onto the conveyor is opened and closed, respectively;

a processing and control unit associated with each production device and unit, each processing and control unit connected to the network for receiving the signals as prompts for corrective action; the auxiliary inspection unit thereby forming a feedback control loop with all of the processing and control units such that a corrective action can be applied to each production device and unit on which the at least one characteristic depends.

Claim 28 has been cancelled.

The following is an examiner's statement of reasons for allowance: The above examiner's amendment along with the Remarks filed 8/29/2011 distinguishes the claimed invention from prior arts of Andrews (U.S Patent No. 5284164) and Draghetti (U.S Patent No. 5695070) and puts the claimed invention in conditions for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PHU NGUYEN whose telephone number is (571)272-5931. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Crispino can be reached on 571-272-1226. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
